

Paul Swuste is an associate professor of the Safety Science Group of the Delft University of Technology, The Netherlands. He has a MSc degree in Biochemistry from the University in Leyden and finished his Ph.D. thesis 'Occupational Hazards and Solutions' in 1996. From 1980 onwards he is working at the Safety Science Group and engaged in research concerning exposure and control measures to occupational hazards, on asbestos, on post academic courses on safety, health and environment, on occupational accidents and its legal aspects in various branches of industry, including the steel industry, rubber industry, chemical industry, transport branch, building branch and the asbestos industry. With Andrew Hale he has organized the post graduate master course 'Management of Safety Health and Environment' from 1994-2008. This course is an international course for safety managers. He was an active member of the ENETOSH group 'higher education', from 2005-2008, and is still involved in the organization of several (inter)national congresses on occupational safety (NVVK, ORP, WOS, SHO), guest editor of several special issues (Safety Science), editor of the Dutch journal on applied occupational sciences, member of committees of the Dutch Health Council (nanomaterials), and the Dutch Safety Board (crane accidents). In the period 1981-2011 he has published 48 international, and 65 Dutch scientific papers.
