ASL NA5 Local Health Authority of Naples

Institution/project

Education for Safety

Short description of the institution/project

Promoting risk awareness and the culture of prevention, in a reference population aged 7-8 years; information necessary to face with the many daily dangers, to prevent accidents at home, on the street and, as future workers, in the workplace.

The programme, quite complex, is part of the global training programme intended to produce relevant changes in individual's behaviour: education to safety means leading young people to know and fully understand the meaning of accident risks as well as collective and individual protection. The target is to make the youngster feel aware and responsible for their own and others' safety.

Education to Safety

Filomena Petraccone, Alfonso Cirillo, ASL NA5 Local Health Authority of Naples

Aim

Promoting risk awareness and the culture of prevention, in a reference population aged 7-8 years; information necessary to face with the many daily dangers, to prevent accidents at home, on the street and, as future workers, in the workplace.

The programme, quite complex, is part of the global training programme intended to produce relevant changes in individual's behaviour: education to safety means leading young people to know and fully understand the meaning of accident risks as well as collective and individual protection. The target is to make the youngster feel aware and responsible for their own and others' safety

The aim of this project activity is to train the youngster to risk perception, assessment and prevention and to make it possible for them to become, in their turn, "carriers " of educational concepts and values to be conveyed to their families, the social institutions and the working environment in the territory.

It is deemed that an effective educational intervention, an activity of prevention, meant to be purposeful, cultural and global, for living and working environment can be pursued by activating a synergy among the activities of the territorial services of the LHA Department of Prevention and Schools, in cooperation with other organizations and institutions and by involving local state-owned and public concerns which participate in the initiative by putting their own means, structures and skills at disposal of the local society.

Short Description

The project provides for:

Training of the teachers involved self-production and collection of teaching material from several Institutes (ISPESL, INAIL, Ministry of the Interior, Street Police, ANIA, etc.) to be made available for teachers and students;

Promotion of working activities in their own classrooms;

Events involving, students and teachers, organized in cooperation with concerns participating in the project;

Closing meeting with students, families, institutions and concerns, about 10.000 people.

Target group

About 450 teachers of the 2nd year of Primary schools

About 4500 pupils of the 2nd year of the Primary schools

1. families of students involved in the project

State-owned and private concerns as well as territorial Institutions
