“Threatened by the noise mafia” – Two agents, Dee and Bee, appear...

Mischa Niedermann and Arno Werner, Komiker GmbH

A multimedia play for schools

... pupils crowd together in the school’s auditorium ... in front the laboratory facilities ... funky music is playing ... the beamer projects spiral animations onto the wall ... and slogans can be heard ...

“Noise is power” ... “Noise gives you respect” ... “Already squeaked today?!” ... “Be loud and clear you mind” ... “To roister is human” ... “Noise for all” ... “Loud is sexy” ... “Power to the sound” ... “All’s well that sounds well” ... “We like noise”

Two noise agents dressed in black go on stage. They are Mr. Dee (Deci) and Mr. Bee (Bel) from the SIA (Sound Intelligence Agency). Together they rescue the students from the notorious noise mafia ...

We demonstrate what noise really is, how the ear deals with sound waves and when and why hearing defects occur. However, the main focus is not on dangerous sound waves, but on common sounds that are interpreted as noise. In this regard, we also elaborate on the negative effects of these sounds: noise makes people tired, nervous, sick (noise can even cause high blood pressure). In order to encourage a quieter and calmer environment, the show ends with discussing several examples that deal with traffic noises. There, we learn what everyone of us can do to improve noisy conditions. The program was developed for pupils aged 15 years or older.
