

Activities of Mainstreaming OSH Into Education in Turkey and The Region

Dr. Rana GÜVEN, MSc, PhD., MoLLS, Turkey

“Safety culture for everybody...”

We have so many collaboration and co-operation relations with national and international institutions like that universities, ministries, NGOs or with ILO and WHO on OHS in Turkey.

The one of the most important collaboration for us is between SESRIC and our Ministry. SESRIC is a center for statistical, economic and social research and training for Islamic Countries. We are carrying out our relations under different programmes like as Expert Exchange Project, Transfer of Innovation Project, Training of Capacity Building Project, OIC Network for OSH Project (OIC-OSHNET).

We established OIC-OSHNET with OIC countries in 2011. The aim of the network is sharing knowledge and experience, conducting joint research and training and organizing new initiatives, projects and programmes in the field of OSH.

Turkey is a bridge not only geographically but also transferring European knowledge and experience on OSH to the OIC member countries. Turkey supports promoting safety culture worldwide.

“Building a Global Culture of Prevention for a Healthy and Safe Future”
